

# SKILCRAFT Expands Line of Tactical Pens

NIB associated agency Alphapointe, in Kansas City, Missouri, is expanding the SKILCRAFT® line of tactical pens with the introduction of two new multi-function writing instruments: the Luminator and the Defender. Like SKILCRAFT's B3 Aviator pens, the Luminator and Defender are manufactured to meet exacting standards and perform in the most challenging environments. Specially designed to fit flight suit and military uniform pockets, all SKILCRAFT tactical pens feature a non-reflective finish on heavy-duty metal barrels for durability. All pens are TAA compliant.

The SKILCRAFT® Luminator LED Light Pen features a red LED light that illuminates as you write for use at night or in inclement weather. The pressurized filler writes in extreme cold or wet weather, in-flight, and in zero-gravity conditions. The battery-operated refillable pen comes with one spare battery and one ink refill.

With the SKILCRAFT® Defender Press-Tip Pen users can write in inclement weather, make small repairs, or break glass. The Defender includes essential Phillips and flathead screwdrivers for quick repairs, and a cap that can be used to break glass up to 8mm thick. The press-tip writing mechanism with distinctive click-to-open-and-close writes upside down and in extreme cold or wet weather conditions.

The Luminator and Defender join SKILCRAFT's B3 Aviator multi-function pens, which offer the convenience of a 0.5mm pencil with screw-top eraser and two-color ink pen in one writing instrument. The Triple Function pen includes a touch screen stylus. B3 Aviator pens provide a 2,000 foot write-out per ink color and the stylus on the triple-function pen provides 10,000 swipes. B3 Aviator pens are FOD and TAA compliant.
